

SALONI SINGH

Bijnor, Uttar Pradesh | +91-9548677059 | salonisingh7190@gmail.com | LinkedIn | GitHub

SUMMARY

Full Stack Developer with 1+ year of hands-on experience engineering scalable web applications and real-time systems using Next.js, React.js, Node.js. Proficient in architecting secure RESTful APIs, implementing JWT-based authentication and role-based access control, and enhancing backend performance. Experienced in developing AI-integrated applications leveraging OpenAI and Google Gemini APIs, delivering measurable improvements in system efficiency and user engagement.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Tailwind CSS

Backend: Node.js, Express.js, Django, Laravel

Database: MySQL, PostgreSQL

Core: JWT Authentication, WebSockets (Socket.IO), SSR & SSG

AI & Integrations: OpenAI API, Google Gemini API, ArcGIS API, Google Maps API, Razorpay

Tools: Git, GitHub, Postman, Maven, VS Code

PROFESSIONAL EXPERIENCE

Web Developer – Tushyer Technologies Pvt. Ltd

April 2025 – Present

- Engineered 5+ scalable full-stack web applications using Next.js, React.js, Node.js, and Django, reducing time-to-delivery by 30%
- Architected RESTful APIs secured with JWT and RBAC, eliminating unauthorized access and improving data security across all services
- Enhanced application SEO and performance using SSR strategies, improving page load speed by 40% and boosting search visibility
- Delivered real-time features via Socket.IO and integrated Razorpay, Cloudinary, and HubSpot CRM, increasing user engagement by 25%
- Optimized API response handling and database queries, reducing backend latency by 35% across production services

PROJECTS

MapNexa – GIS Platform for Outdoor & Construction Services | React.js, Django, PostgreSQL, ArcGIS API, Google Maps API
[Live](#)

- Built a GIS-based aerial mapping platform serving outdoor and construction businesses, reducing manual estimation time by 50%
- Integrated ArcGIS and Google Maps APIs for geospatial visualization, enabling area measurement accuracy within a 2% margin
- Developed 10+ scalable REST API endpoints with responsive frontend interfaces supporting real-time spatial data management
- Implemented map-based estimation and reporting features, improving project planning efficiency for construction teams by 40%

Jarvis | React, Node.js, Express.js, MongoDB, Tailwind CSS

[Live](#)

- Built a production-ready MERN stack AI assistant handling 100+ concurrent sessions with sub-second response times
- Engineered secure REST APIs with JWT and RBAC, achieving zero authentication vulnerabilities across all user roles
- Integrated OpenAI API to power intelligent conversational features, improving query resolution accuracy by 60%
- Implemented real-time bidirectional communication via Socket.IO, reducing message delivery latency by 45%
- Designed a responsive Tailwind CSS UI ensuring 100% cross-device compatibility across mobile, tablet, and desktop

Responder – AI Email Assistant | Java, Spring Boot, Spring WebFlux

[GitHub](#)

- Built a reactive Spring Boot service with Gemini AI, reducing email drafting time by 70% through intelligent auto-generation
- Enabled non-blocking async API communication via WebClient, improving system throughput by 3x under concurrent load
- Managed JSON processing with Jackson Databind, reducing payload parsing errors by 90% across all API interactions
- Designed modular service architecture supporting 3+ AI provider integrations with zero downtime during provider switches
- Achieved sub-200ms average response time by leveraging reactive streams and event-driven processing pipelines

EDUCATION

B.Tech – Computer Science & Engineering (CGPA: 7.41)

2021 – 2025

Kunwar Satyavira College of Engineering and Management

Intermediate – PCM (CGPA: 8.5)

2020 – 2021

Saraswati Vidya Mandir

CERTIFICATIONS

- Java Development Training – CETPA Pvt. Ltd.
- Code for Bharat Hackathon (2025) – Built an AI-powered interview platform using Next.js
- Strong foundation in Core Java, OOP, JDBC, and multithreading
